

Accessing Google Email From Thunderbird

Do you have a Google Gmail account? If so, Thunderbird can get you connected. Here's how you can check both your OWLS / NFLS email and Gmail within the same Thunderbird profile.

1. Click on the Tools drop down menu.
2. Then click on "Account Settings..."

3. Click on "Add Account..."

4. In the Account Wizard window, select "Gmail"
5. Click "Next" to continue.

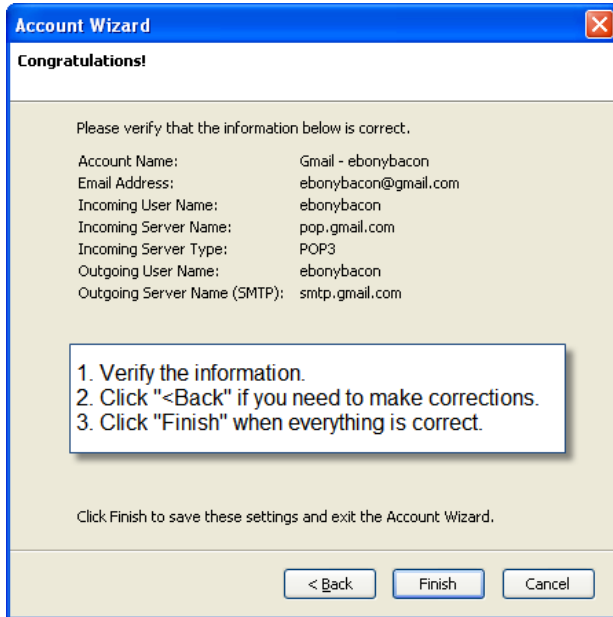

6. Next follow the steps in the image below.

7. Once you've verified the information, you can click "Finish".

As you can see in the image below, the Google Gmail account has been added.

8. Click "OK" to complete the setup process.

The image below now shows 2 email accounts in the current Thunderbird profile. An OWLS email account, and a Gmail account. Each with its own separate Inbox and Trash bin.

To read your Gmail, simply select its Inbox.
