

To Boldly Go... InfoSoup: The Next Generation

Wednesday, December 18, 9:15 am–12:30 pm
Appleton Public Library, Meeting Room C

OWLSnet librarians have expressed interest in adding a Discovery Layer to replace InfoSoup and enhance access to OWLSnet products and services. But what exactly is a Discovery Layer? How does it help our patrons? What options are available, and how will OWLSnet go about choosing?

We'll discuss all of these things at this workshop for all OWLSnet member library staff. Staff from other library systems are welcome to attend, but the discussion will be focused on OWLSnet.
